This is a "Map of Morgan County in the Central Mineral and Coal Fields of Missouri." The undated map shows the locations of principal towns and villages, roads, churches, schools, mines, and deposits of barite, coal, kaolin, lead, and zinc.

The map is 18 ½" x 24". It does not appear to have been removed from an atlas. It bears no publisher's imprint or date of publication. However, the lines of the Chicago, Rock Island & Pacific and the St. Louis, Kansas City & Colorado railroads are shown, which dates the map circa 1905.
